## + Employment

### Mobile Developer 2012

Abylsen

A 3 months' internship approving my Bachelor. I developed a mobile application for I-Phone (using XCode) which has a public IHM for many information and a back office developped with the framework Sencha for workers of the firm. All the information are hosted in a database.

### Mobile Developer 2011

Cimalp Communication

A 10 weeks internship approving my H.N.D. I developped my firsts mobile applications (Sport-up and ZapSport) during this internship. The first was only an introduction in order to discovering the mobile development by parsing an XML file and display information into the app. The second use the API GoogleMap to display information about a run training in real time.
